

Lottery Investment Platform

Complete Project Description & Functional Requirements

1. Project Overview

The platform will be a web-based lottery and reward system where users can register, deposit funds, select an available lottery/investment plan, and participate when the selected lottery opens.

Each plan will have a defined investment amount and a corresponding reward amount. When a user's lottery is successfully opened/won, the user receives the predefined reward according to the selected plan.

The platform will contain three major sections: Public Website / Landing Pages, User Panel, and Admin Panel.

2. Public Website / Landing Page

Header: Website logo, Home, How It Works, Lottery Plans, Winners, Reviews, FAQ, Contact Us, Login, Register.

Hero Section: Attractive introduction with a headline such as “Invest in a Lottery Plan and Get Rewarded When Your Lottery Opens”, description, Register Now/Login buttons, and featured lottery information.

How It Works: Register → Deposit → Select a Plan → Participate → Lottery Opens/Result → Reward → Withdraw.

3. Lottery Plans

Example plans:

Investment	Reward
Rs. 10	Rs. 100
Rs. 500	Rs. 5,000
Rs. 1,000	Rs. 7,000
Rs. 3,000	Rs. 10,000
Rs. 10,000	Rs. 30,000

4. Winners Section

Display previous lottery winners with masked name, username/support ID, investment amount, reward amount, and winning date.

5. Reviews / Testimonials

Display customer reviews with user name, avatar, rating, review text, and date. Reviews should preferably be based on genuine user feedback.

6. Statistics Section

Possible statistics include Total Registered Users, Total Participants, Total Rewards Distributed, Total Active Plans, and Total Completed Lotteries. Values should come from actual platform data.

7. FAQ Section

Questions may cover registration, deposits, participation, winner selection, reward crediting, withdrawals, withdrawal passwords, and support.

8. Footer

Company links, Terms & Conditions, Privacy Policy, Responsible Participation, Refund Policy, Withdrawal Policy, Support links, contact details, social media, and copyright.

9. Registration System

Fields: Full Name, Mobile Number, Withdrawal Password, Confirm Withdrawal Password.

Username will be generated automatically from the user's name and mobile number and must be unique. A unique Support ID/User ID will also be generated.

10. Login System

Users will log in using their mobile number. The final authentication method should be defined separately; for security, a dedicated login credential or OTP is preferable to using the withdrawal password as the only authentication factor.

11. User Panel

Dashboard, Lottery Plans, My Participations, Wallets, Deposits, Withdrawals, Transactions, Rewards, Profile, and Support.

12. User Dashboard

Show Main Wallet Balance, Deposit Wallet Balance, Total Deposited, Total Withdrawn, Total Investment, Total Rewards, Active Lotteries, Completed Lotteries, and recent activity.

13. Wallet System

Possible wallet categories: Main Wallet, Investment Wallet, and Reward Wallet. The final wallet structure can be simplified according to the business rules.

14. Deposit System

Users can submit deposit requests with amount, payment method, transaction/reference number, proof where required, date, and status. Statuses: Pending, Approved, Rejected.

15. Lottery Participation

Users select an available plan. The system checks wallet balance, plan availability, eligibility, and lottery status. If valid, the investment amount is deducted and a participation record is created.

16. Lottery Status

Possible statuses: Upcoming, Open, In Progress, Completed, Cancelled.

17. Rewards / Winners

Record lottery, plan, participant/result, investment, reward, date, and transaction reference. If a user wins according to the platform rules, the reward is credited to the appropriate wallet.

18. Withdrawal System

Fields: withdrawal amount, withdrawal method, account/wallet number, account holder name, withdrawal password, and optional remarks. Statuses: Pending, Processing, Approved, Rejected, Cancelled.

19. Transaction History

Transaction types can include Deposit, Withdrawal, Lottery Investment, Reward, Refund, and Adjustment. Each record should include ID, type, amount, date, description, status, balance before, and balance after.

20. User Profile

Display Name, Mobile Number, Username, Support ID, Account Status, and Registration Date.

21. Admin Panel

Dashboard, Lottery Plans, Users, Transactions, Deposit Requests, Withdrawal Requests, Lottery Management, Winners, Reviews, Notifications, Settings, and Support.

22. Admin Dashboard

Show Total Users, Active Users, Total Deposits, Pending Deposits, Total Withdrawals, Pending Withdrawals, Total Investments, Total Rewards, Active Lotteries, and Completed Lotteries. Charts can cover deposits, withdrawals, registrations, participation, and rewards.

23. Plan Management

Admin can create/edit/manage plans with Plan Name, Investment Amount, Reward Amount, participant limits, opening/closing date/time, status, description, and image/icon.

24. User Management

Admin can view User ID, Support ID, Username, Name, Mobile Number, Wallet Balance, deposits, withdrawals, investments, status, and registration date. Admin actions include view, edit, block/unblock, transaction history, and authorized balance adjustments.

25. Transaction Management

Admin can view/filter transactions by ID, user, type, date range, amount, and status.

26. Deposit Requests

Admin can review user, amount, payment method, reference number, proof, date, and status, then approve or reject the request.

27. Withdrawal Requests

Admin can review user, amount, withdrawal method, account details, date, and status, then approve/reject/process with remarks.

28. Winner Management

Admin can manage lottery results and record lottery, plan, participants, selected result/winner, investment, reward, result date, and transaction reference. Automated/random selection should be clearly defined and auditable.

29. Reviews Management

Admin can add, edit, approve, hide, and delete testimonials/reviews.

30. Notification Management

Notifications can cover deposit approvals/rejections, withdrawal approvals/rejections, lottery events, results, rewards, account notifications, and promotional messages.

31. Admin Settings

General: Website name, URL, email, support phone, currency, timezone.

Logo: Website logo, favicon, login logo.

SMTP: Host, port, username, password, encryption, from email/name.

Notifications: Email, SMS, and system notification settings.

Payment: Deposit methods, withdrawal methods, account details, and instructions.

32. Security Requirements

Use secure password hashing, OTP/mobile verification where applicable, CSRF protection, rate limiting, login attempt protection, role/permission management, transaction audit logs, secure withdrawal verification, input validation, SQL injection/XSS protection, secure file upload validation, admin activity logs, and session security. Never store withdrawal passwords in plain text.

33. Responsive Design

The platform should be fully responsive for desktop, laptop, tablet, Android, and iPhone, with mobile-friendly user and admin navigation.

34. Overall User Flow

New User: Landing Page → Register → Account Created → Login → Dashboard → Deposit → Select Plan → Participate → Lottery Result → Reward/Result → Wallet → Withdrawal.

Existing User: Login → Dashboard → Wallet → Plans → Participate → Track Lottery → Result → Manage Balance.

Admin: Admin Login → Dashboard → Users → Plans → Deposits → Withdrawals → Lotteries → Winners → Notifications → Settings.

35. Important Business Logic

Before development, finalize how a lottery opens, winner selection, whether every participant can win, participant limits, number of winners, reward calculation, minimum withdrawal, fees, deposit confirmation, refunds, cancellations, eligibility, timing, and simultaneous plan participation.

36. Suggested Technology Structure

Backend: Laravel, PHP, MySQL.

Frontend: Blade, Bootstrap 5, JavaScript, AJAX, DataTables.

Admin: Laravel-based custom dashboard with roles and permissions.

Architecture: Keep users, wallets, deposits, withdrawals, lottery participation, lottery results, rewards, and transactions as separate entities for auditability.

37. Compliance Note

This platform involves real-money deposits and lottery-style rewards. Before launch, the business model should be reviewed for applicable lottery/gambling, financial, consumer-protection, KYC/AML, payment-processing, taxation, and licensing requirements in each jurisdiction where it will operate.
